Information

BNP Paribas Easy (the “Company”) is an open-ended investment company (*Société d’Investissement à Capital Variable* – SICAV). The Company was created as a common fund (fonds commun de placement – abbreviated to FCP) bearing the name “EasyETF FTSE EPRA Eurozone”, under the Luxembourg Law on 7 July 2004 and for an indefinite period. It changed its name into “FTSE EPRA Eurozone THEAM Easy UCITS ETF” on 8 August 2014.

On 28 December 2015, the Company was converted from the legal form of a common fund into the legal form of an open-ended investment company, and changed its name into “BNP Paribas Easy”. A notice was published in the *Mémorial, Recueil Spécial des Sociétés et Associations* (the “Mémorial”).

The latest version of the Articles of Association has been filed with the Trade and Companies Registrar of Luxembourg, where any interested party may consult it and obtain a copy.

The Company is currently governed by the provisions of Part I of the Law of 17 December 2010, as amended, governing Undertakings for Collective Investment, as well as by Directive 2009/65 as amended by the Directive 2014/91.

The Company’s capital is expressed in euros (“EUR”) and is at all times equal to the total net assets of the various sub-funds. It is represented by fully paid-up shares issued without a designated par value. The capital varies automatically without the notification and specific recording measures required for increases and decreases in the capital of limited companies. Its minimum capital is defined by the Law.

The Company is registered in the Luxembourg Trade Register under the number B 202 012.

Information to the Shareholders

The Articles of Association, the Prospectus, the KIIDs, and periodic reports may be consulted at the Company’s registered office and at the establishments responsible for the Company’s financial service. Copies of the Articles of Association and the annual and interim reports are available on request.

Except for the newspaper publications required by Law, the official media going forward to obtain any notice to shareholders will be our website www.bnpparibas-am.com.

Documents and information are also available on the website: www.bnpparibas-am.com.

The annual report is made public within four months of the end of the financial year and the interim report within two months of the end of the half-year.

As to net asset values and dividends, the Company publishes the legally required information in the Grand Duchy of Luxembourg and in all other countries where the shares are publicly offered.

This information is also available on the website: www.bnpparibas-am.com.

Net asset values are calculated every full bank business day in Luxembourg and if the benchmark index is published. The last Business day of the year will be a Valuation Day.

Manager's report

Economy

The global economy was quite robust in the second half of 2017, but weakened somewhat in early 2018, apart from the United States, where indicators remained very solid. Worldwide, with economic activity surveys not showing any signs of improvement, the second half of 2018 was marked by the rise of uncertainties and downward revisions in global growth forecasts, which nonetheless held up rather well. Political issues played a big role, as did fears over the solidity of global growth. After the US customs tariffs hike on new Chinese products came into effect in September, the protectionist threat continued to be closely monitored by observers. Central bankers took a cautious view of the global economy. While sticking to its tightening stance, the Fed shifted its language late in the year to a more flexible approach to the monetary policy that it intends to implement in 2019. The ECB began to very gingerly to phase out quantitative easing (QE) very late in the year and reiterated that it would not raise its key rates until autumn 2019. After rising to more than USD 75/bbl. (in the case of WTI), oil pulled back sharply, on 24 December hitting a low since mid-2017 at USD 42. It ended the year down 25%, at USD 45, as US output just kept expanding.

United States

After rising by 2.3% in the fourth quarter of 2017 and by 2.2% in the first quarter 2018, US GDP accelerated in 2018 to 4.2% in the second quarter and to 3.4% in the third. For the full year, it is likely to come in at about 3.0%, before falling back to 2.3% in 2019, which is still above potential. The job market is still quite solid, as seen in the unemployment rate, which fell to its lowest point since December 1969 (3.7%). Wages are beginning to show signs of accelerating. Against this backdrop, household consumption was strong late in the year. However, there was some disappointment in investment and durable goods orders, as well as in regional manufacturing surveys. The increase in consumer prices is still under control. After showing signs of acceleration during the summer, core inflation (ex-food and energy) levelled off below 2%. Some companies (in all sectors) expressed concerns that the Trump administration's hike in customs tariffs would hit their business activity going forward. The Democratic Party won back a majority in the House of Representatives in the 6 November mid-term elections. The disagreement on funding the building of a wall on the Mexican border triggered a partial federal government shutdown.

Europe

After the very strong expansion of the second half of 2017, which had raised year-on-year GDP growth to a high since early 2011 (at 2.8%, then 2.7% in the third and fourth quarters of 2017) and with 2018 appearing to have begun on the same trend, growth forecasts had to be revised downward due to the slowdown that had actually occurred and to highly disappointing indicators. And, indeed, after GDP growth of 0.2% in the third quarter of 2018 (0.4% in the first and second), economic activity surveys pointed to an ongoing slowdown. The composite PMI (purchasing manager index) in manufacturing and services fell to a four-year low in December after having hit an almost 12-year high in January. Moreover, national accounts pointed to weak domestic end demand in the third quarter. However, several factors do look encouraging, including the steady improvement in employment (with the jobless rate at 8.1%, a 10-year low), which is beginning to flow into far stronger wage increases and continued strength in credit distribution to the private sector. The rise of uncertainties (over protectionism and the situation in Italy) is a risk for the coming quarters. Inflation rose from 1.3% in January 2018 to 1.6% in December, while core inflation (i.e., ex-food and ex-energy) continued to hover directionless around 1% year-on-year.

United Kingdom

In response to the decision of the United Kingdom (UK) to trigger Article 50 of the Treaty of the European Union (EU) leading to its withdrawal from the European Union at the currently planned date of 29 March 2019, BNPP AM has set up a comprehensive contingency plan in order to continue to serve its clients without interruption, in all cases including the event of an exit without the ratification of a withdrawal agreement. In particular, the investment policy has been reviewed and any reference to the EU or the EEA (European Economic Area) has been assessed in order to adapt accordingly all related documentation and if necessary, in a limited number of occurrences, to adapt the product composition. For the funds distributed in France and eligible to PEA (Plan d'Epargne en Actions or share savings plan) a French tax investment scheme, an impact analysis has been made, appropriate measures have been set up and will be communicated to holders concerned when the exit date is confirmed. For the funds currently distributed in the UK, a notification is being submitted to the FCA - Financial Conduct Authority, the UK regulator to benefit from the TPR Temporary Permission Regime to continue to market temporarily in the UK.

Manager's report

Japan

GDP contracted in the first quarter of 2018 (by -1.3% at an annualised pace), driven by weaker consumption and a sharp slowdown in exports. It rebounded in the second quarter (to +2.8%), then contracted once again in the third quarter (-2.5%), driven by exceptional natural factors, including typhoons and an earthquake. Although activity indices slipped slightly in the third quarter, the Tankan economic survey reflected still-solid domestic demand and a shift in growth. After falling to a 26-year low (at 2.2%), the unemployment rate remained very low (at 2.5% in November). A slight acceleration in wages began. On the political front, the decline in Shinzo Abe's popularity raised some concerns but did not keep him from being re-elected as the head of the Liberal Democratic Party in September 2018, thus ensuring he would stay on as prime minister and, from investors' point of view, that the government would stick to its proactive economic policy. Total inflation rose from 0.6% in November 2017 to 0.8% one year later but the ex-fresh food/ex-energy index moved directionless at a level (+0.3% in November) that was far below the objective. Despite this unflattering number, the Bank of Japan (BoJ) gradually reduced its securities purchases and, in late July, adjusted its yield curve control policy. The target range of 10-year JGB yields still revolves around 0%, but may now extend as far as 0.20% vs. 0.10% previously. However, in response to expectations that emerged in late 2018 of a more rapid normalisation in its monetary policy, the governor of the Bank of Japan reiterated that the inflation target remains the priority.

Emerging markets

In 2018, emerging economies experienced various fortunes, with structural weaknesses specific to certain countries (such as Argentina, which was forced to request IMF assistance, and Turkey) and political turmoil in others (in Brazil, for example). Meanwhile, higher US interest rates pushed investors to doubt the outlook in emerging markets. The lack of contagion to currencies backed by better fundamentals and the rally of the Turkish lira and the Argentine peso in the fourth quarter are encouraging signs. Purchasing manager surveys showed a shift in the manufacturing sector with an aggregate index for emerging markets approaching the threshold of contraction (from 52.2 at the end of 2017 to 50.3 at end-2018). However, keep in mind that world trade has held up and that dip in survey data may have been exacerbated by "trade war concerns". Surveys in the services sector rebounded late in the year. In China the economy slowed gradually (from 6.8% at end-2017 to 6.5% in the third quarter of 2018), driven by the impact of the deliberate limitation of credit. It hit its slowest pace since 2009, leading monetary authorities during the autumn to announce monetary and fiscal stimulus measures. Indicators released late in the year (exports, retail sales, industrial output and business surveys) confirmed that a slowdown is in progress, but one that Chinese officials themselves acknowledge is not yet due to higher US customs duties.

Monetary policy

The European Central Bank (ECB) has made no change to its interest rates (with its main refinancing rate at 0%, its marginal lending facility at 0.25%, and its deposit facility of -0.40%) since March 2016. Several moves were made to recalibrate non-conventional measures in 2018. In March, the "downward bias" language that had been introduced in 2016 and pointed to a possible prolongation or expansion in securities purchases, was removed. It had already ceased to be a key item in ECB forward guidance. The markets focused more on the QE (quantitative easing) exit strategy, as economic activity showed some signs of slowdown and inflation remained moderate. Following the 14 June Governing Council meeting, the ECB proposed a very precise roadmap: net purchases under the Public Sector Purchase Programme (PSPP), which had been at EUR 30 billion per month since January, would be reduced to EUR 15 billion after September and halted entirely in December; reinvestments of proceeds from maturing securities would continue, thus helping to stabilise the balance sheet beginning in January 2019. Meanwhile, key rates would "remain at their present levels at least through the summer of 2019". The ECB then devoted its official guidance to confirming this announcement of QE normalisation and guiding expectations toward a first rate increase in autumn 2019. Mario Draghi became more cautious late in the year on the economic outlook, pointing out external risks (a slowdown in global growth, protectionism, and financial market conditions) and domestic ones. However, the ECB still believes that economic activity will continue to expand and that the squeeze in production capacities and jobs will lead to an acceleration of core inflation in the medium term.

In 2018, the US Federal Reserve raised its interest rates in March, June, September and December. Each time, the decision had been fully priced in. Since the 18-19 December FOMC meeting, the federal funds target rate has ranged between 2.25% and 2.50%. This is the ninth increase since the tightening cycle began, in December 2015. Meanwhile, in October 2017 the Fed began to shrink its balance sheet by limiting reinvestments of proceeds of maturing securities (T-Notes and MBS). Since then, USD 385 billion have not been reinvested. According to the Fed, these operations have gone smoothly and have required no adjustments. The transition at the chair of the Fed in February 2018 went off well after having raised some concerns. The new chairman, Jerome Powell, had already sat on the FOMC and seemed to be

Manager's report

picking up where Janet Yellen left off. For example, in May, the Fed began stating officially that its inflation target was “symmetric” at about 2%. Meanwhile, Powell pointed out the difficulty of estimating potential growth and the related variables, thus justifying a pragmatic approach to monetary policy. Based on the strength of the US economy, FOMC members said they were confident of the need to continue raising key rates but stepped somewhat away from this position late in the year. In reaction to burgeoning risks to global growth and financial market turmoil in the fourth quarter, the Fed said it would henceforth take a more data-based and flexible approach to monetary policy. In December, it appeared that the Fed had lowered the federal funds rate considered neutral compared to the rate it had indicated in September (from 2.90% to 2.75%) and was now planning just two rate increases in 2019 (down from three previously) and one in 2020. The Fed continued to forecast GDP growth above its potential, but Powell has taken a more cautious line and seems to be hesitating about pushing monetary policy into restrictive territory.

Currency markets

From the very start of the year, the EUR/USD trended upward, quickly reaching 1.25, a high since late 2014. The euro was driven during this phase by expectations of a more rapid normalisation of ECB monetary policy and by very solid economic indicators. In late January, the US Treasury secretary’s language (“a weaker dollar is good for us”) pushed the euro momentarily above 1.25. It stabilised slightly below this level until mid-April, when the issues driving the EUR/USD reversed themselves, with more and more US economic data better than expected and a decline in indicators elsewhere. This scenario of a desynchronisation of growth between the US and the rest of the world led market participants to expect more aggressive Fed monetary policy, and this pushed US bond yields up and capital flows out of emerging markets. The turmoil experienced by several currencies (mainly the Argentinian peso and the Turkish lira), undermined by structural weaknesses, triggered a retreat into the currencies of developed economies traditionally considered safe havens (the Japanese yen, Swiss franc and, to a lesser extent, the US dollar). The EUR/USD quickly moved towards 1.15, even falling to 1.13 in mid-August. This moved the euro even further away from its fundamental value and led President Trump to state again that the dollar was too high. The EUR/USD then rallied, traded erratically and sunk again amid uncertainties over the political situation in Italy, hitting about 1.12 on 12 November, a low since mid-2017. Beginning in mid-November, it traded between 1.13 and 1.15, tracking monetary policy decisions and comments on both sides of the Atlantic. The EUR/USD ended down 4.6% on the year, at 1.1450.

The USD/JPY traded erratically in 2018 within a broad, 105-114 range. In March, it fell back to its lows since November 2016, at less than 105 vs. 112.65 at end-2017. Expectations of a monetary policy shift by the Bank of Japan (BoJ) contributed to this strengthening in the yen, despite denials by Governor Kuroda. These expectations were driven by the difficulties of Prime Minister Abe, who was indirectly implicated in an influence-peddling scandal. The yen’s safe haven status also played a part, in reaction to financial market turmoil triggered by US protectionist measures. Beginning in late April, the dollar’s across-the-board gains sent the exchange rate above 112, despite the slight less accommodative shift in BoJ monetary policy in July. Not until the second half of December did the yen move back up. Investors expect the reduction in securities purchases to continue and expect an increase in key rates to assist financial establishments, whose problems have been exacerbated by negative rates. The yen ended the year up 2.7%, at 109.72 per dollar.

Bond markets

From the very start of 2018, several factors triggered a steep decline on the US bond market, including fears of a glut of paper and expectations of a greater-than-expected toughening in monetary policies in major developed economies in general and the US in particular. In February, these pressures were exacerbated by expectations of an acceleration in inflation after the release of wages (average hourly earnings) that were far higher than forecast. This sent the 10-year T-note surging to 2.90% in February. It traded for some time between this level and 2.75% before spiking again, this time to 3.11% on 17 May (for a total year-to-date increase of 70bp). It then pulled back sharply amid a flight to safety in reaction to geopolitical and political fears and, from mid-May to mid-September, traded directionless between 2.80% and 3.00% before breaking firmly through the 3% threshold for the second time this year, reaching almost 3.25% on 5 October (a high since May 2011). This trend was driven by the Fed chairman’s highly optimistic language, which reinforced expectations of a more aggressive increase in key rates, the release of the jobs report, which revealed that the unemployment rate was at a near-50-year low, and a record ISM non-manufacturing number. Until mid-November, the 10-year T-Note yield traded between 3.25% and 3.05%, tracking inflation and wage figures and Fed comments. Yields then began to pull back, driven by equity market turmoil, global growth doubts, and a few disappointing US economic indicators. The 10-year T-Note yield ended the year at 2.68%, a low since late January and up just 27bp in 2018, despite the 100bp increase in key rates.

The 10-year Bund yield took a rocky path, ending the year at 0.24%, vs. 0.43% at the end of 2017, clearly outperforming the US market with a 19bp decline in twelve months. Driven by expectations of a more rapid

Manager's report

normalisation in ECB monetary policy and upward pressures on US bond yields, it had risen as high as 0.75% in mid-February (a high since autumn 2015). Thereafter, it fell back to about 0.50% by the end of March on the ECB's renewed accommodative language, a slight decline in eurozone business surveys and still-low inflation, before experiencing new turmoil, particularly when the result of the 4 March Italian legislative elections brought back fears of the "eurozone risk". On 29 May, the 10-year Bund yield fell below 0.30% (something that had not happened since mid-2017), as some aspects of the 21 May agreement by the Five-Star Movement (M5S) and the League raised fears that Italy was taking a path that would inevitably lead it to a wider fiscal deficit. This is what drove most eurozone bond trends in the following months. After trading around 120bp until spring, the spread between 10-year Italian and German paper soared above 250bp (a high since mid-2013) and stayed around that level from May to October. Another spike to slightly above 325bp in mid-October was followed by pullback to 250bp on Rome's concessions.

Equity markets

2018 got off to a flying start on global equity markets. The rally that began in late 2017 with the passing of US tax cuts, spilled over into January 2018, with the MSCI AC World index achieving its 15th consecutive monthly gain. But then things took a turn for the worse. Between 26 January and 8 February, the MSCI AC World index (in dollars) lost 9% when inflationary fears emerged. Technical factors such as short-volatility financial products exacerbated the declines. This sudden drop was followed by a chaotic rally, driven by a solid macro and microeconomic environment, but the markets took something of a wait-and-see attitude until the end of the second quarter. Investor doubts were driven by several major risks, the first among these being the rise in protectionism and partial questioning of expectations of synchronised global growth. However, equities were driven most of all by President Trump's trade policy. Investors were reassured little by little when they saw that the "trade war" would probably remain a Sino-US matter and not become a global one. Even, so visibility did not improve in this area. Corporate results remained very solid, particularly in the US, as tax cuts boosted the economy. Against this backdrop, global equities were still in positive territory on the year to end-September 2017 (+2.2% by the MSCI AC World index), driven by a strong showing in the US (+9.1% by the MSCI USA index). However, everything changed in the fourth quarter. After its steepest decline since May 2012 (-7.6% in October) and a slight rise in November (+1.3%), the MSCI AC World index lost 7.2% in December, despite a post-Christmas rally. The full-year drop (-11.2%) was the steepest since 2008. Emerging markets lost 16.6% after performing poorly early in the summer amid massive capital outflows from several markets that had less solid fundamentals and were less able to withstand higher Fed interest rates and a stronger dollar. The swoon in global equities in October was triggered by upward pressure on US bond yields amid an acceleration in wages and expectations of a more rapid tightening in US monetary policy. These concerns faded quickly but the basic issue was left unresolved, as investors are having a hard time grasping the financial market impact of the normalisation of monetary policy in G4 countries – first and foremost the Fed's moves in the US – and are therefore especially jittery on this subject. Investor nervousness was driven by global growth fears, which were exacerbated by signs of slowdown in the Chinese economy. Investors also focused on political factors (particularly the worldwide rise in populism), which stoked rising volatility in equities compared to the very low levels of 2017. Here are the full-year performances of the main indices (in local currencies and without reinvested dividends) on the major developed markets: -6.2% by the S&P 500, -12.1% by the Nikkei 225, and -14.3% by the EuroStoxx 50.

The Board of Directors

Luxembourg, 25 January 2019

Note: The information stated in this report is historical and not necessarily indicative of future performance.

Audit report

To the Shareholders of
BNP Paribas Easy

Report on the audit of the financial statements

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of BNP Paribas Easy and of each of its sub-funds (the “Fund”) as at 31 December 2018, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2018;
- the securities portfolio as at 31 December 2018;
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the EU Regulation No 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

To the best of our knowledge and belief, we declare that we have not provided non-audit services that are prohibited under Article 5(1) of Regulation (EU) No 537/2014.

The non-audit services that we have provided to the Fund, for the year then ended, are disclosed herebelow.

- The preparation of VAT declaration of the Fund.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period, and include the most significant assessed risks of material misstatement (whether or not due to fraud). These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the Key audit matter
<p>Valuation of complex OTC derivative instruments</p> <p>The valuation of such investments is considered to be a Key Audit Matter due to the potential magnitude of material misstatement, combined with the complexity and/or judgement associated with estimating their fair value.</p> <p>Refer to Note 2 of the financial statements for the valuation policy for such instruments.</p>	<p>We gained an understanding of the internal control structure and operating effectiveness of key controls surrounding valuation of OTC derivative instruments through observations, inquiries, and tests of all intervening parties in the valuation process. In addition, we gained an understanding of internal controls implemented by the Management Company including key controls over the fair value process.</p> <p>As of 31 December 2018, a number of the Fund's sub-funds invested in complex OTC derivative instruments. Such instruments are composed by total return swaps.</p> <p>For complex OTC derivatives such as, total return swaps, we independently determined a range of acceptable values, through the use of internally developed models using recognised methodologies, taking into account the key terms of the contracts and observable market data.</p> <p>In addition, for all OTC derivatives, we compared the value of such derivatives to the counter-valuation performed by the Fund's Management Company.</p>

Key audit matter	How our audit addressed the Key audit matter
Existence of OTC derivatives and collateral <p>The existence of such assets is considered to be a Key Audit Matter due to the potential magnitude of material misstatement combined with the higher inherent risk for assets that cannot be held by the Depositary Bank.</p>	<p>We gained an understanding of the internal control structure and operating effectiveness of key controls surrounding authorisation, completeness and accuracy of OTC derivative transactions and the reconciliation process in place for these instruments.</p> <p>We obtained from the Depositary Bank, the confirmation (through the inventory statement as required by the CSSF Circular 16/644) of the ownership by the Fund of all OTC derivative instruments and collateral amounts linked to these contracts (including those that cannot be held in custody). We agreed all positions as per Depositary Bank inventory statement to the Fund's accounting records.</p> <p>In addition, we tested reconciliations to counterparties performed by the Depositary Bank and the reconciliation between accounting positions and the ones held by the Depositary Bank.</p>

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our audit report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as "Réviseur d'entreprises agréé" of the Fund by the General Meeting of the Shareholders on 26 April 2018 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 4 years.

Note 2 - Principal accounting methods

a) *Presentation of the financial statements*

The financial statements of the Company are presented in accordance with the legislation in force in Luxembourg governing undertakings for collective investment. The currency of the Company is the euro (EUR).

BNP Paribas Easy's (consolidated) financial statements are expressed in EUR by converting the financial statements of the sub-funds denominated in currencies other than EUR at the exchange rate prevailing at the end of the financial year.

The statement of operations and changes in net assets covers the financial year from 1 January 2018 to 31 December 2018.

b) *Net asset value*

This annual report is prepared on the basis of the last net asset value available as at 31 December 2018.

c) *Valuation of the securities portfolio*

The value of shares or units in undertakings for collective investment shall be determined on the basis of the last net asset value available on the Valuation Day. If this price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

The valuation of all securities listed on a stock exchange or any other regulated market which functions regularly, is recognised and accessible to the public, is based on the last known closing price on the Valuation Day, and, if the securities concerned are traded on several markets, on the basis of the last known closing price on the major market on which they are traded, or the relevant market as used by the index provider. If the last known closing price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

Unlisted securities or securities not traded on a stock exchange or another regulated market which functions in a regular manner is recognised and accessible to the public, shall be valued on the basis of the probable sale price estimated in a prudent and bona fide manner by a qualified professional appointed for this purpose by the Board of Directors.

If permitted by market practice, liquid assets, Money Market instruments and all other instruments may be valued at their nominal value plus accrued interest or according to the linear amortisation method. Any decision to value the assets in the portfolio using the linear amortisation method must be approved by the Board of Directors, which will record the reasons for such a decision. The Board of Directors will put in place appropriate checks and controls concerning the valuation of the instruments.

d) *Conversion of foreign currencies*

The accounts of each sub-fund are kept in the currency in which its net asset value is expressed, and the financial statements are expressed in that currency.

The cost of investments denominated in currencies other than the sub-fund accounting currency is converted into that currency at exchange rate prevailing at the purchase date.

Income and expenses in currencies other than the sub-fund accounting currency are converted into that currency at the exchange rate at the transaction date.

The resulting realized and unrealized foreign exchange profits or losses are included in the Statement of Operations and Changes in Net Assets.

The exchange rates used for each date are the WM Reuters closing spot rates 4 pm London time.

Notes to the financial statements at 31/12/2018

e) *Valuation of forward foreign exchange contracts*

Unexpired forward foreign exchange contracts are valued on the basis of the forward exchange rates applicable on the valuation date or the closing date, and the resulting unrealised profits or losses are recorded in the accounts.

f) *Valuation of futures contracts*

Unexpired futures contracts are valued at the last price known on the valuation date or closing date and the resulting unrealised profits or losses are accounted for.

Margin accounts to guarantee the liabilities on futures contracts are included in the “Cash at banks and time deposits” account in the statement of net assets.

g) *Valuation of swaps*

A Total Return Swap (TRS) is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity.

Total return swaps are marked to market at each NAV calculation date. The unrealised appreciation/depreciation is disclosed in the Statement of net assets under “Net Unrealised gain/(loss) on financial instruments”. Realised gains/(losses) and change in unrealised appreciation/depreciation as a result thereof are included in the Statement of operations and changes in net assets respectively under “Net realised result on Financial instruments” and “Movement on net unrealised gain/(loss) on Financial instruments”.

h) *Income*

Dividends are recorded at the ex-dividend date. Interest is recorded on an accrual basis.

i) *Tracking error*

The tracking error is the difference between the return on a sub-fund, and the benchmark it is expected to track. It is measured as the standard deviation of the difference in the fund's and index's returns over time.

Note 3 - Management fees (maximum per annum)

Management fees are calculated and deducted monthly from the average net assets of a sub-fund, share category, or share class, paid to the Management Company and serve to cover remuneration of the asset managers and also distributors in connection with the marketing of the Company's stock.

The management fees applicable to the “UCITS ETF” category are applicable to all share sub-categories and classes with the word “UCITS ETF” in their denomination.

The management fees applicable to the “Track Classic” category are applicable to all share sub-categories and classes with the word “Track Classic” in their denomination.

The management fees applicable to the “Track I” category are applicable to all share sub-categories and classes with the word “Track I” in their denomination.

The management fees applicable to the “Track I Plus” category are applicable to all share sub-categories and classes with the word “Track I Plus” in their denomination.

The management fees applicable to the “Track Privilege” category are applicable to all share sub-categories and classes with the word “Track Privilege” in their denomination.

A sub-fund may not invest in a UCITS, or other UCI (underlying), with a management fee exceeding 3% per annum.

Note 4 - Other fees

Other fees are calculated at each Valuation Day, provisioned during the month in question whenever the Net Asset Value is calculated and paid monthly in arrears from the average net assets of a sub-fund, category, or share class and serve to cover general custody assets expenses (remuneration of the Custodian) and daily administration expenses (NAV calculation, record and book keeping, notices to the shareholders, providing and printing the documents legally required for the shareholders, domiciliation, auditors cost and fees...), except for brokerage fees, license fees, commissions for transactions not related to the deposit, director fees, interest and bank fees, extraordinary expenses, reporting cost in relation with regulation requirements including the European Market Infrastructure Regulation (EMIR), and the “*taxe d’abonnement*” in force in Luxembourg, as well as any other specific foreign tax and other regulators levy.

Note 5 - Taxes

The Company is liable to an annual “*taxe d’abonnement*” in Luxembourg representing 0.05% of the net asset value. This rate is reduced to 0.01% for:

- a) sub-funds with the exclusive objective of collective investment in money market instruments and deposits with credit institutions;
- b) sub-funds with the exclusive objective of collective investment with credit institutions;
- c) sub-funds, categories or classes reserved for Institutional Investors, Managers and UCIs.

The following are exempt from this “*taxe d’abonnement*”:

- a) the value of assets represented by units or shares in other UCIs, provided that these units, or shares have already been subject to the “*taxe d’abonnement*”;
- b) sub-funds, categories and/or classes:
 - (i) whose securities are reserved for Institutional Investors, Managers, or UCIs and
 - (ii) whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and
 - (iii) whose weighted residual portfolio maturity does not exceed 90 days, and
 - (iv) that have obtained the highest possible rating from a recognised rating agency;

Notes to the financial statements at 31/12/2018

- c) sub-funds, categories and/or classes reserved to:
 - (i) institutions for occupational retirement pension or similar investment vehicles, set up at the initiative of one or more employers for the benefit of their employees, and
 - (ii) companies having one or more employers investing funds to provide pension benefits to their employees;
- d) sub-funds whose main objective is investment in microfinance institutions;
- e) sub-funds, categories and/or classes:
 - (i) whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly that is recognized and open to the public, and
 - (ii) whose exclusive object is to replicate the performance of one or several indices.

When it is due, the “*taxe d’abonnement*” is payable quarterly on the basis of the relevant net assets and is calculated at the end of the quarter for which the tax is applicable.

In addition, the Company may be subject to foreign UCI’s tax, and/or other regulators levy in the country where the sub-fund is registered for distribution.

Note 6 - Dividends

Note 7 - Share currencies

The net asset value per share is priced in the currency of the share class and not in the currency of the sub-fund in the section "Key figures relating to the last 3 years".

Note 8 - Exchange rates

The exchange rates used for consolidation and for the conversion of share classes denominated in a currency other than the reference currency of the relevant sub-fund as at 31 December 2018 were the following:

EUR 1 =	GBP 0.89755
EUR 1 =	NOK 9.89875
EUR 1 =	USD 1.14315

Note 11 - Swaps

Total Return Swaps

A Total Return Swap (TRS) is an agreement to exchange the total performance of a bond or other underlying asset (share, index, etc.) for a benchmark rate plus a spread. The total performance includes the interest coupons, dividends and profits and losses on the underlying asset over the life of the agreement, depending on the type of underlying concerned. The risk in this type of agreement is linked to the fact that the benefit for each counterparty will depend on how the underlying asset performs over time, which is unknown at the time at which the agreement is entered into.

Note 13 - Changes in the composition of the securities portfolio

The list of changes in the composition of the securities portfolio during the year is available free of charge at the Management Company's registered office and from local agents.

Note 14 - List of Investment managers

As at 31 December 2018, all opened sub-funds are managed by BNP PARIBAS ASSET MANAGEMENT France.

Notes to the financial statements at 31/12/2018

Note 15 - Transaction fees

Transaction fees incurred by the Fund relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of standard fees, sundry fees on transaction, stamp fees, brokerage fees, custody fees, VAT fees, stock exchange fees and RTO fees (Reception and Transmission of Orders).

In line with bond market practice, a bid-offer spread is applied when buying and selling these securities. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's fee.

Note 16 - Tax reclaims as part of the Aberdeen/Fokus Bank Project

In several European Union member states, community law grants undertakings for collective investments (UCIs) the right to file claims with a view to recovering taxes they have been unjustly forced to pay. When one member state imposes a greater tax burden on a foreign UCI than on a resident UCI, this constitutes discrimination under community law.

This principle was confirmed by the ruling of the Court of Justice of the European Union (CJEU) in the "Aberdeen" case (18 June 2009). This ruling acknowledges that a non-resident UCI can be subject to discriminatory taxation, which constitutes an obstacle to freedom of establishment and/or the free movement of capital. Other CJEU rulings have subsequently confirmed this jurisprudence. Key examples are the rulings in the Santander (10 May 2010) and Emerging Markets (10 April 2014) cases regarding French and Polish tax legislation, respectively.

In light of this jurisprudence and in order to safeguard the right of UCIs to receive tax rebates, the management company has decided to file claims with the tax authorities in several member states whose discriminatory legislation fails to comply with community law. Preliminary studies will be carried out to determine whether or not the claims are viable, i.e. for which funds, in which member states and over what period of time it is necessary to request a rebate.

To date, there is no European legislation establishing a uniform framework for this type of claim. As a result, the time taken to receive a rebate and the complexity of the procedure vary depending on the member state in question. This means that it is necessary to constantly monitor developments in this regard.

Due to the uncertainty of the recoverability of the amounts, no accrual is recorded and it is booked under the caption "Income on investments and assets" when received.

Note 17 - Subsequent event

Launch of the sub-fund "€ Corp Bond SRI Fossil Free" on 15 January 2019.

Liquidation of the sub-fund "Barclays US Treasury" on 29 March 2019.

Unaudited appendix

Global market risk exposure

The Management Company of the Fund, after a risk profile assessment, decided to adopt the commitment approach to determine the global market risk exposure.

Information on the Remuneration Policy in effect within the Management Company

Below are the quantitative information on remuneration, as required by Article 22 of the AIFM directive (Directive 2011/ 61 / EC of 8 June 2011) and by Article 69 (3) of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format compliant with the recommendations of the AFG (French Asset Management Association)¹.

Aggregate quantitative information for members of staff of BNPP PARIBAS ASSET MANAGEMENT (“BNPP AM Luxembourg”) (art 22-2-e of AIFM directive and art 69-3 (a) of the UCITS V directive):

Business Area	Number of Staff	Total Remuneration (k EUR)	Number of Staff
BNPP AM Luxembourg	84	8 242	1 080

Aggregate quantitative information for members of staff whose actions have a material impact on the risk profile of the firm and who are indeed “Identified Staff”² (art 22-2-f of AIFM directive and art 69-3 (b) of the UCITS V directive):

Business Area	Number of Staff	Total Remuneration (k EUR)
Identified Staff of BNPP AM Luxembourg	5	946
<i>Of which AIF/ UCITS and European mandates Portfolio managers</i>	0	0

Other information about BNPP AM Luxembourg:

– Number of AIF and UCITS Funds under management of BNPP AM Luxembourg:

	Number of sub-funds (31/12/2018)	AuM (billion EUR) (31/12/2018) ³
UCITS sub-funds	210	76.2
AIFs sub-funds	22	2.7

- Under the supervision of the BNP PARIBAS ASSET MANAGEMENT Holding's remuneration committee and its board of directors, an independent and central audit of the Global BNP PARIBAS ASSET MANAGEMENT remuneration policy and its implementation over the 2017/2018 financial year was conducted between May and July 2018. The results of this audit, which covered BNP PARIBAS ASSET MANAGEMENT entities included in the integrated perimeter with an AIFM and/or UCITS licence, was rated “Generally satisfactory”.
- Indeed, no significant issues were found. However, in line with the BNP PARIBAS ASSET MANAGEMENT's continuous improvement approach, a recommendation was issued, which aims to better align the deferred compensation terms of an executive of BNP PARIBAS ASSET MANAGEMENT, who is also subject to the remuneration framework stemming from the French transposition of EU Directive CRD IV.
- In 2018, the remuneration policy was adapted, under the supervision of French AMF regulatory authority and in accordance with the requirements of the UCITS Directive, to improve the alignment of interest of identified staff through the award of new deferred instruments. In particular, the performance of the most representative funds of BNP PARIBAS ASSET MANAGEMENT has an increased weight in these new instruments.
- More information on the determination of the variable remuneration and in deferred instruments is set out in the qualitative disclosure on the remuneration policy, which is available on the website of the company.

¹ NB.1 : The remuneration amounts above are not directly reconcilable with the accounting data of the year, as they reflect the amounts allocated at the closing, in May 2018, of the annual compensation review process (CRP), based on the scope of employees as at 31 October 2017. Thus, for example, these amounts include all variable remuneration awarded during this CRP, whether this variable remuneration is deferred or not, and whether the employees ultimately remained in the company or not.
^{NB.2 :} As a reminder, level 3 of UCITS V regulation (eg minimum deferred etc...) was published in March 2016 and applies for the first time in performance year 2017, ie to variable remuneration that was awarded in March 2018.

² The identified staff is determined based on end of year review.

³ The amounts indicated take into account the master-feeder funds.

* Calculated gross of fees in the sub-fund currency.

This explains the jumps of the Tracking Error and mainly the overperformance of the fund versus its reference benchmark.

The ex post Tracking Error (TE) represents the standard deviation of the performance difference between the sub-fund and its benchmark. The ex post Tracking Error is expressed in percentage.

The Tracking Error shown in the table above mainly comes from transactions costs, small illiquid components and dividend re-investment.

Regulation on transparency of Securities Financing Transactions and Reuse of collateral (SFTR)

This collateral applies to all OTC activity of this fund. There is no way to distinguish it upon type of instrument it is related to.
