(1) All figures net of fees (in EUR). The value of your investments may fluctuate. Past performance is no guarantee for future results. A - 01/1997 - 05/2013: Following a corporate action on 17/05/2013, the performances listed are those of the subfund BNP PARIBAS L1 EQUITY WORLD ENERGY.

B - 2014 - 2019: During this period, the fund had a different investment policy and different Benchmark.

Benchmark: The sub-fund also has a thematic composite benchmark being 50% Wilderhill Clean Energy index (ECO) + 50% Wilderhill New Energy Global Innovation index (NEX) used to compare performance relative to the clean energy theme. The sub-fund is not benchmark-constrained, and its performance may deviate significantly from that of the above-mentioned benchmarks. The benchmark MSCI AC World (EUR) NR is thus only used for long-term performance comparison relative to the broad global equity market. In order to assess fund performance against the fund's investment objective, only the thematic benchmark is shown in the chart above. This is for illustrative purposes only.

Label(s)

The fund has received recognition from the Belgian Central Labeling Agency in the form of Towards Sustainability Label.

The Towards Sustainability label helps all types of retail and institutional investors looking for more sustainable savings and investment solutions. Which in its turn encourages financial institutions to offer a diverse and high-quality range of sustainable products.

For more information on the label, visit the website: www.towardssustainability.be

RISK

Risk Indicator

Risk Analysis (3 years, monthly)

Risk Analysis (3 years, monthly)	Fund
Volatility	34.41
Ex-post Tracking Error	28.74
Information Ratio	-0.45
Sharpe Ratio	0.04
Alpha	-18.17
Beta	1.80
R ²	0.35

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money

We have classified this Product as 6 out of 7, which is the second-highest risk class.

The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product not included in the summary risk indicator:

- **Liquidity risk:** this risk arises from the difficulty of selling a security at its fair value and within a reasonable period of time due to a lack of buyers.
- **Operational risk:** In the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).
- **Risk related to investments in mainland China:** these investments are subject to risks specific to the Chinese financial markets which may result from political, economic, social, tax, market and operational factors specific to the Chinese market.

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

GLOSSARY

Alpha

Alpha is an indicator used to measure the value added by an active portfolio manager relative to a passive exposure to a benchmark. A positive alpha expresses an outperformance whereas a negative alpha indicates an underperformance. A simple way to calculate alpha is to subtract a portfolio's expected return (based on the benchmark's performance adjusted with the beta of the portfolio, see Beta definition for further details). For instance, an alpha of 0.50 means that the portfolio outperformed the market-based return (benchmark's performance adjusted from the Beta exposure of the portfolio) by 0.50%.

Beta

Beta is a measure of portfolio market risk, the market being represented by financial indices (such as MSCI World) that are consistent with the portfolio's guidelines. It measures the sensitivity of portfolio performance to the performance of the market. For example a beta of 1.5 means the portfolio will move by 1.5% for a market performance of 1%. Mathematically, it is the correlation between the portfolio and the market multiplied by their ratio of volatilities.

Information Ratio

The information ratio is a risk-adjusted return that measures the relationship between the portfolio's tracking error and its relative return compared with the benchmark index (called active return).

R²

The Correlation Coefficient indicates the strength and direction of a linear relationship between fund performance and benchmark. The coefficient is an element of [-1,1], where 1 equals a perfectly correlated increasing linear relationship, -1 equals a perfectly correlated decreasing linear relationship, and 0 means that there is no linear correlation.

Sharpe Ratio

A measure for calculating risk-adjusted return. It indicates the return earned in excess of the risk-free rate per unit of risk. It is calculated by dividing the difference between the return and the risk-free rate by the standard deviation of the return on the investment. The Sharpe ratio indicates whether the excess return was obtained thanks to good investment management or by taking additional risk. The higher the ratio, the better the risk-adjusted return.

Tracking Error

The tracking error measures the volatility of a portfolio's relative return in relation to its benchmark index.

Volatility

An asset's volatility is the standard deviation of its return. As a measure of dispersion, it evaluates the uncertainty of asset prices, which is often equated to their risk. Volatility can be calculated ex post (retrospectively) or estimated ex ante (anticipatively).
