

Key Investor Information

This document provides key information for investors in this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so that you can make an informed decision about whether to invest.

Equity Europe Climate Care Protection 90%, a Subfund of the SICAV THEAM QUANT-

Class "Protected C EUR Capitalisation" - ISIN code LU2051101272

This Sub-Fund is managed by BNP PARIBAS ASSET MANAGEMENT France, part of the BNP Paribas Group

Objectives and Investment Policy

The Sub-Fund seeks to increase the value of its assets over the medium term by being exposed to a dynamic basket of equities listed on European markets or operating on these markets, the components of which are chosen using a systematic selection method based on environmental, social and governance criteria (ESG) as well as a carbon emission and energy transition criteria, and to distribute an annual coupon of 1% for the distribution share classes (the distribution of this amount is not guaranteed). In addition, the Sub-fund benefits from a protection mechanism from the Guarantor whereby, on each Valuation Day, the Net Asset Value per Share of each Class is at least equal to ninety percent (90%) of the Reference Net Asset Value per Share of the Class as defined below. For each Class, the Reference Net Asset Value per Share of the Class is equal to the maximum between i) the Net Asset Value per Share of the Class on the last Valuation Day of the previous calendar year (after deduction of the distributed coupon as the case may be), and ii) the highest Net Asset Value per Share of the Class reached over the current calendar year.

In order to achieve its investment objective, the Sub-fund implements a quantitative investment strategy (the Strategy) that provides exposure to the performance of a basket of liquid European companies that incorporate high ESG standards such as, but not limited to, energy efficiency, respect of human and workers' rights, board of directors independence, while not being involved in disputable activities or critical controversies and displaying low implication in coal, oil and gas activities and which are (i) either not continuing or (ii) phasing out practices that are widely considered as unsustainable.

Then the allocation algorithm follows a thematic investing approach which assigns optimal weight to each share of the investment universe in a manner which seeks to maximize the energy transition criteria of the resulting basket of shares. This optimisation is applied according to the principal constraints of risk mitigation including an ex-ante tracking error below 5% with regards to the Stoxx Europe 600 Net Return EUR (Bloomberg code: SXXR Index) and of a carbon footprint less than or equal to 50% of the carbon footprint of a European reference investment universe. The Strategy may be exposed to equities that are not included in Stoxx Europe 600 Net Return EUR.

An extra-financial strategy may comprise methodological limitations such as the Risk related to ESG investment or the Risk related to a systematic allocation incorporating extra-financial criteria.

The Strategy is implemented via the use of the BNP Paribas Equity Climate Care Europe NTR Index financial index (the Strategy Index). It is based on a systematic model developed by BNP Paribas and is rebalanced quarterly using a specific algorithm. The rebalancing of the Strategy Index does not involve any cost for the Strategy Index.

For further information on the Strategy Index, investors are invited to consult the following website: <https://indx.bnpparibas.com>. The complete breakdown of the Strategy Index and performance information are available on the same page. The index calculation method is available directly at: <https://indx.bnpparibas.com/nr/ECCE.pdf>.

The protection mechanism associated to each Class consists in generating variable exposure to the performance of the Strategy and to cash or Money Market Instruments on a basis at least equal to the level of protection. Exposure to the Strategy is determined by carrying out an allocation using a quantitative mechanism. Exposure to the Strategy varies each day depending on both the performance of the Strategy and the level of protection of each Class.

As from its launch date, the share class will be exposed to the common pool of asset's allocation, i.e. allocation between the Strategy Index (risky assets) and cash or Money Market Instruments (low risk assets).

The strategy of the Sub-fund is deemed active. The Sub-fund does not have any benchmark for performance comparison purpose.

The Strategy will be implemented either according to a Synthetic Replication Policy, through the conclusion of OTC Derivatives or in cash by partially investing directly in the basket of equities that make up the Strategy. The Synthetic Replication Policy implies that the Sub-Fund does not actually hold the underlying securities of the index, but instead relies on OTC Derivatives to partially deliver the performance of the Strategy Index.

Investors are able to subscribe or redeem any day which the Paris, London, Frankfurt and Stockholm, exchanges are open during the whole day (excluding Saturdays and Sundays and Luxembourg and French public holidays).

Subscription and redemption requests can be made to the administrative agent before 12.00 pm (CET) at the latest on the relevant valuation day.

Administrative agent: BNP Paribas Securities Services, Luxembourg Branch, 60, avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

Income are systematically reinvested.

Risk and Reward Profile

Lower risk Higher risk

Typically lower reward Typically higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Past performance such as the information used to calculate the synthetic indicator may not be a reliable indication of the sub-fund's future risk profile.
- The risk category associated with this sub-fund is not guaranteed and may change over time.
- The lowest category does not mean "risk free".

The risk category is justified by the investment mainly in Stocks and Shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Significant risk(s) not taken into account in the indicator which could lead to a drop in the net asset value:

- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Risk linked to the use of forward financial instruments:** We use forward financial instruments traded over the counter in order to track the performance of the strategy. These instruments may involve a series of risks that could lead to adjustments or even a termination of the instrument, which could influence the net asset value.

Charges

The charges and fees paid are used to cover the costs of running the sub-fund, including the costs of marketing and distributing shares; these charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the UCITS over a year	
Ongoing charges	1.70% ^(*)
Charges taken from the UCITS under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

(*) The percentage of ongoing charges is based on an annualised estimation of the charges that will be taken during the first financial year. This figure may vary from year to year. It excludes:

- intermediary charges, except in the case of entry and/or exit charges paid by the sub-fund when buying or selling units in another collective investment scheme. In case of conversion, the investors may be charged a maximum fee of 1.5%.

For more information about charges, please see the "Charges and fees" section of the sub-fund's prospectus, which is available online at www.bnpparibas-am.com.

Past Performance

- The share class was launched on the 1 July 2021.
- Therefore there is insufficient data to provide a useful indication of past performance.
