## WHAT IS THIS PRODUCT?

## Type

This Product is an undertaking for collective investment in transferable securities (UCITS). It is a sub-fund of BNP PARIBAS FLEXI I, an open-ended investment company (société d'investissement à capital variable "SICAV") governed by the provisions of Part I of the Luxembourg Law of 17 December 2010 (the "2010 Law") relating to undertakings for collective investment as well as by UCITS Directive 2009/65.

## Term

This Product has a fixed final maturity date of 28/09/2029.

It will be dissolved on that date unless otherwise decided by the board of directors of the fund.

## Objectives

The Product seeks to achieve until 28 September 2029, an annual performance after fees of at least 3%, which is comparable to that of its investment universe at the end of the "Ramp Up Period" as defined in the prospectus. The performance objective is based on market assumptions used by the management company. It does not constitute a promise of return. The Product will invest at least 2/3 of its asset in quasi-sovereign and corporate, Investment Grade and Non-Investment Grade bonds denominated in EUR issued, or whose issuer conducts a significant portion of its activity, in developed countries. Such investment shall be made in fixed rate bonds with a similar maturity as the Product.

The Product may invest a minimum of 70% of its net assets in Investment Grade Bonds, and up to 30% of its net assets in Non-Investment Grade Bonds (observed at the end of Ramp Up Period).

The Investment Manager makes decision regarding the selection of issuers within countries and sectors based on a composite benchmark, according to the following target allocation: 75% of Bloomberg Euro Aggregate Corporate (EUR Unhedged) and 25% of ICE BofA BB-B European Currency Non-Financial High Yield Constrained Index, (the "Composite Index"). The sub-fund is actively managed and as such may invest in securities that are not included in the Composite Index. The Product adopts a «Buy and hold» strategy in order to obtain a portfolio of bonds that are mainly held until their maturity.

Active monitoring and regular review are performed by the Investment Manager, in order to take appropriate actions (including but not limited to selling and purchasing the above mentioned securities).

The sub-fund will invest a minimum of 20% of its net assets in green, social and sustainability bonds during the investment period.

Environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

## Intended retail investors

This Product is designed for investors who have neither financial expertise nor any specific knowledge to understand the Product but nevertheless may bear a total capital loss. It is suited for clients who seek growth of capital. Potential investors should have an investment horizon of maturity of the fund (i.e. 28/09/2029).

## Practical Information

■ Depositary: BNP PARIBAS, Luxembourg Branch

■ This key information document is prepared for the aforementioned share class and describes a sub-fund of BNP PARIBAS FLEXI I. Further information about the Product is contained in the prospectus and periodical reports which are issued at the level of the SICAV. Under the 2010 Law, there is segregated liability between sub-funds, meaning that the assets of the sub-fund will not be available to meet a claim of a creditor or another third-party made against another sub-fund.

■ Investors may switch between sub-funds of the SICAV. Please see the prospectus or contact your financial adviser for details.

■ Further information about the Product including the latest prospectus, Articles of Association, key information document, net asset values, latest published prices of share(s), periodical report, investment description, may be obtained free of cost, in English, from BNPP AM Luxembourg or online at <https://www.bnpparibas-am.com>.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

## Risk Indicator

The risk indicator assumes you keep the Product until 28/09/2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 2 out of 7, which is a low risk class. The risk category is justified by the investment mainly in interest rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.

**Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Other risks materially relevant to the Product not included in the summary risk indicator:

■ **Credit risk:** the risk that the creditworthiness of an issuer may deteriorate or that it may default, potentially causing the value of the associated instruments to fall.

■ **Liquidity risk:** this risk arises from the difficulty of selling a security at its fair value and within a reasonable period of time due to a lack of buyers.

■ **Operational risk:** in the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. The markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: until the maturity date of the Product	If you exit after 1 year	If you exit at maturity (28/09/2029)
Example Investment: EUR 10,000		

### Scenarios

<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	<b>What you might get back after costs</b>	8,219.03 EUR	6,983.35 EUR
	Average return each year	-17.81%	-6.94%

## WHAT HAPPENS IF BNPP AM LUXEMBOURG IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM Luxembourg. In the event BNPP AM Luxembourg would default, the assets of the Product/SICAV, held by a depositary, would not be affected by this default.

In case of default of the depositary, the risk of financial loss of the Product/SICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/SICAV.

## WHAT ARE THE COSTS?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

■ in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

■ EUR 10,000 is invested.

	If you exit after 1 year	If you exit at maturity (28/09/2029)
<b>Total Cost</b>	313.68 EUR	786.08 EUR
<b>Cost Impact (*)</b>	3.16%	1.57% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.33% before costs and -0.23% after costs.

**Composition of costs**
