

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Capital Builder, a subfund of the SICAV BNP PARIBAS A FUND

Class "Classic RH SGD Capitalisation" - ISIN code LU2019216519

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund belongs to the category of fund of funds. It seeks to increase the value of its assets over the medium to long term by mainly investing in UCITS and/or UCI providing exposure to different asset classes (e.g. shares, bonds, real estate investments, alternative investments, and money market instruments). The remaining portion of assets may be invested directly in equities, debt securities, money market instruments and/or ancillary cash.

The Fund is actively managed without reference to an index.

The asset classes mix within the Sub-Fund are variable and will change based on the Investment Manager's short and medium terms market views.

The allowable bandwidths across the different asset classes are: Equities: 0-100%, Bonds: 0-100%, Money Market: 0-45%, Real Estate Investments(1) : 0-25%, Alternative Investments(2) (Real Estate Investment excluded): 0-30%.

(1) The sub-fund does not hold real estate directly. Real Estate Investments made under the Real Estate Securities asset class will be composed of Close-ended REITS only.

(2) Alternative investments will mainly focus on Absolute Return Funds while not being limited solely to this type of Funds.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

This share class aims at hedging the portfolio return from USD to SGD.

Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment in different asset classes with a standard asset mix that is a low proportion of risky assets and a high proportion of less risky assets.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.
