Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. The management company may at its discretion pay dividends out of the capital of the sub-funds. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-fund's capital may result in an immediate reduction of the net asset value per share. Investors should read the offering document (including the key facts statement) for further details including the risk factors.
