- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?

This risk category is justified by the investment in eligible money market instruments as per Regulation and short term bonds that have a low volatility.

- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
