BOND MARKET

FLATTISH

Ahead of long weekend tomorrow due to Good Friday, Indonesia bond market closed the week relatively flat. The bond market saw no improvement in risk sentiment today, although we witnessed two ways trading in the market. Morning session saw selling interest started by offshore players. While in the afternoon session as we witnessed mixed names showed their buying interest, particularly after London opened although trading volume remained thin. Thin trading volume during the day pushed bidders to be more defensive. Price movement went back to range bound lacking fresh catalyst.
