

- The fund seeks to increase the value of its assets over the medium term by investing primarily in local emerging bonds.
- The fund is exposed to interest rate and credit risks.
- The fund may invest in non-investment grade or unrated debt securities including sovereign debt, which may expose the fund to higher credit/default risk and volatility.
- The fund has significant exposure to emerging markets and is likely to be subject to a higher than average volatility. Emerging markets may have higher legal, regulatory and political risk.
- The management company may at its discretion pay dividends out of the capital of the fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital may result in an immediate reduction of the net asset value per share.
- The monthly distribution share classes will continue to distribute monthly dividends in periods when the fund has negative return, which will further reduce the net asset value of the fund.
- Investors should not solely rely on this document to make any investment decision. Please refer to the Hong Kong offering document for further information (including the risk factors) about the fund.
