INDEX DESCRIPTION:

The benchmark is the J.P. Morgan ESG EMU Government Bond IG 3- 5 Year (TR) Index published by JP Morgan. The composition of the index is reviewed on a monthly basis. The index is valued daily. The Index aims to track the performance of eligible fixed-rate, euro-denominated domestic government debt issued by Eurozone countries with minimum €80 billion debt outstanding. Securities must be rated investment grade and mature in the next 3 to 5 years to be eligible. The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria, and to underweight or remove issuers that rank lower. The Comparison Index is the JPM EMU 3-5 Years (EUR) RI

MSCI ESG Quality Score (0-10)	6.3		

Total ESG score

BNPP AM's internal ESG scoring methodology determines an issuer's ESG score by evaluating performance vs. scoring peers on a narrow set of key ESG issues related to the environment (e.g. climate change), social issues (e.g. human resources management) and governance (e.g. independence and competence of directors). BNPP AM uses numerous research inputs and data sources (e.g. Sustainalytic, ISS & Trucost) to determine issuers' ESG scores. If the issuer's commitments and practices on a pillar of assessment (E,S or G) is better than scoring peers, it will receive a positive 'contribution' for this pillar. Each issuer is assigned a final score from 1 to 99 which is the result of 50 as a reference plus the sum of the contributions from each of the three pillars.

ESG Contribution

The ESG contributions are determined by BNP Paribas Asset Management's ESG analysts on the basis of detailed criteria to systematically evaluate companies' commitments, performance and practices in the areas of environmental, social and governance. Each of the above contributions at the portfolio level, is the weighted average of the contributions of the individual portfolio holdings.Environmental Contribution (E) takes into account, among other things, climate change, environmental risk management, and the use of natural resources. Social Contribution (S) takes into account, among other things, human capital management, the quality of social dialogue, and the respect of diversity. Governance Contribution (G) takes into account, among other things, the transparency on executive compensation, the fight against corruption, and gender equality.

Portfolio Coverage

The coverage represents, within an Index replicated by the fund, the percentage of securities that have an ESG score or carbon footprint using BNPP AM's internalmethodology which can be lower than the full coverage offered per the index provider

MSCI ESG Fund Rating

The MSCI ESG rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA:AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI Weighted Average Carbon Intensity

It measures a funds's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per $1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity Coverage.

It is the percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

MSCI ESG Quality Score (0-10)

The MSCI ESG Quality Score (0-10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

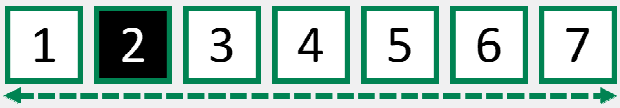

For more information on ESG indicators, please refer to BNPP AM's webpage : https://www.bnpparibas-am.com/en/esg-scoring-framework/ & https://www.bnpparibas-am.com/en/measuring-carbon-footprints/
For more detailed information on our sustainability documents, please refer to BNPP AM's webpage : https://www.bnpparibas-am.com/en/sustainability-documents/

Label(s)

The fund has received recognition from the Belgian Central Labeling Agency in the form of Towards Sustainability Label.
The Towards Sustainability label helps all types of retail and institutional investors looking for more sustainable savings and investment solutions. Which in its turn encourages financial institutions to offer a diverse and high-quality range of sustainable products.
For more information on the label, visit the website: www.towardssustainability.be

RISK

Risk Indicator

Lower risk **Higher risk**

The risk indicator assumes you keep the Product for 3 years.
You may not be able to sell your Product easily or you may have to sell at a price that significantly impacts on how much you get back.

Risk Analysis (1 year, weekly)	**Fund**
Volatility	2.34
Ex-post Tracking Error	0.00
Tracking Error Official Benchmark / Comparison Index	0.02
Modified Duration (30.09.2026)	3.65
Yield to Maturity (30.09.2026)	3.65
Average coupon	2.00
Duration	3.71

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money

We have classified this Product as 2 out of 7, which is a low risk class.
The risk category is justified by the investment mainly in interest rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Product not included in the summary risk indicator:
- **Credit risk:** the risk that the creditworthiness of an issuer may deteriorate or that it may default, potentially causing the value of the associated instruments to fall.
- **Operational risk:** In the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).

For additional details regarding the risks, please refer to the prospectus.
This Product does not include any protection from future market performance so you could lose some or all of your investment.

GLOSSARY

Tracking Error
The tracking error measures the volatility of a portfolio's relative return in relation to its benchmark index.

Volatility
An asset's volatility is the standard deviation of its return. As a measure of dispersion, it evaluates the uncertainty of asset prices, which is often equated to their risk. Volatility can be calculated ex post (retrospectively) or estimated ex ante (anticipatively).
