

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

BNP PARIBAS INSTICASH EUR 3M STANDARD VNAV, a Subfund of the SICAV BNP PARIBAS INSTICASH

Class "Privilege M Distribution Distribution" - ISIN code LU0957145369

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The Fund is a standard variable net asset value money market fund (hereinafter a «MMF») as defined by the regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds (the «Regulation»).

It seeks to achieve the best possible return in line with prevailing money market rates, over a 3-month period while aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity and diversification; the 3-month period corresponds to the recommended investment horizon of the Fund.

The Fund invests within the limits set out in the Regulation in a diversified portfolio of money market instruments, deposits with credit institutions, repurchase agreements and reverse repurchase agreements, units or shares of short term MMFs or other Standard MMFs and ancillary liquid assets in EUR.

The Fund is not a guaranteed product. An investment in the Fund differs from an investment in deposits, with the risk that the principal invested in a sub-fund is capable of fluctuation. BNP PARIBAS InstiCash does not rely on external support for guaranteeing the liquidity of the sub-funds or stabilising the NAV per share. The loss of the principal is to be borne by the shareholders. There is no currency exposure, other than to the EUR.

It is actively managed against the Cash Index EONIA (RI).

The Fund may also use financial derivative instruments (interest rate swaps) for hedging purposes. The impact of these financial derivative instruments will be taken into account for the calculation of the weighted average maturity (interest rate risk) of the Fund. These financial derivative instruments will be used in line with the money market investment strategy of the Fund.

It invests in securities of high credit quality. The Management Company performs its own documented assessment of the credit quality of money market instruments and issuers that allows it to consider a money market instrument as being of high quality.

A dividend may be distributed when the net investment income (capital gain and loss realised, including coupons) is positive. In such circumstances, the number of shares held and the value of the relevant holding will decrease and the relevant investors will get back less than originally invested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

Risk and Reward Profile

Lower risk ←————→ Higher risk
Typically lower reward Typically higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
This risk category is justified by the investment in eligible money market instruments as per Regulation and short term bonds that have a low volatility.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.

For more information on risks, please see the "Investment risks" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.

Charges

The charges you pay are used to pay the Fund's running costs, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No
Exit charge	No
This is the maximum that might be taken out of your money (before the proceeds of your investment are paid out).	
Charges taken from the Fund over each year	
Ongoing charges	0.14%
Charges taken from the fund under specific conditions	
Performance fee	No

The **ongoing charges** figure shown here is an estimate of the charges. Due to recent change in the fees structure, an estimate is used rather than an ex-post figure.

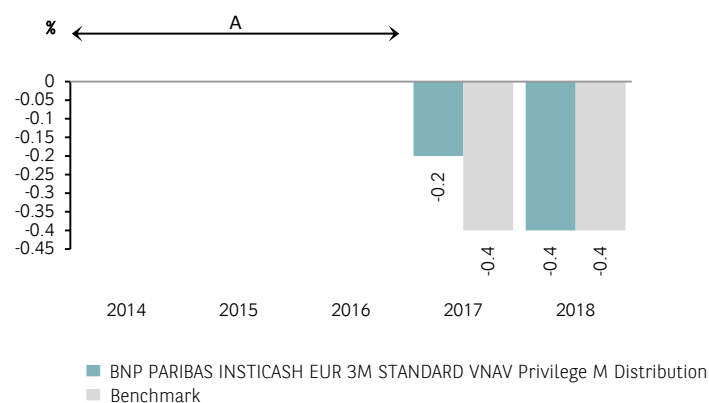

This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking. In case of conversion, no fee will be charged.

For more information about charges, please see the "Fees and Costs" section of the Fund's prospectus, which is available at www.bnpparibas-am.com.

Past Performance

That year / these years the fund had different characteristics.

A: 16/10/2014 - 31/05/2016 : During this period, there is insufficient data to provide a useful indication of past performance

- Performance figures are shown for shares classes, for which NAV was continuously calculated during the period from 1st January to 31st December.
- Past performance is not an indicator of future results.
- The ongoing charges of the Fund are included in the calculation of past performance.
- The share class came into existence in 2013
- Past performance has been calculated in EUR
- Performance returns are based on the net asset value with distributable income reinvested.
