## WHAT IS THIS PRODUCT?

### Type

This Product is an undertaking for collective investment in transferable securities (UCITS). It is a sub-fund of THEAM QUANT-, an open-ended investment company (société d'investissement à capital variable "SICAV") governed by the provisions of Part I of the Luxembourg Law of 17 December 2010 (the "2010 Law") relating to undertakings for collective investment as well as by UCITS Directive 2009/65.

### Term

This Product has no maturity date.

BNPP AM is not entitled to terminate the Product unilaterally. The board of directors has the authority to decide on the merger, split, liquidation or the closure of the sub-fund. Furthermore, the SICAV may be wound up by decision of an extraordinary general meeting of shareholders.

### Objectives

The objective of the Sub-fund is to increase the value of its assets over the medium- to long-term.

In order to achieve its investment objective, the Sub-fund implements a synthetically replicated strategy (the "Strategy") that can be qualified as "global macro", consisting of two pillars:

(a) A "core" flexible exposure to the US equity markets, revised regularly to benefit from short-term opportunities based on the anticipated direction of such markets.

(b) A Diversification Portfolio, involving exposure to some or all of the below: non-US equities, derivatives, debt securities (including structured debt securities such as certificates for a maximum of 10% of the Sub-fund's net assets), commodities (via Exchange Traded Commodities for a maximum of 20% of the Sub-fund's assets).

The net exposure of the Sub-fund to the US equity markets may vary significantly over time, and may occasionally be negative.

Union Bancaire Privée, UBP SA (« UBP SA ») has been appointed by the Management Company as delegated Investment Manager for this Sub-fund. This delegation is limited to the following role: UBP SA regularly adjusts exposure of the Strategy to equity markets based on its fundamental analysis and anticipations of short-term market movements, and selects the appropriate assets to include in the Diversification Portfolio. The decision-making consists of assessing the economic cycle, macro variables, valuations and other factors, to formulate anticipations on asset classes and prices of financial securities.

The Sub-fund is actively managed, with no reference to a benchmark.

The net exposure of the Sub-fund to the US equity markets may vary significantly over time, and may occasionally be negative.

To implement the Strategy, the Sub-fund uses a synthetic replication policy through the conclusion of OTC Derivatives (including unfunded TRS).

Subscription and redemption requests can be made to the administrative agent before 12.00 pm (CET) at the latest on the relevant valuation day.

Administrative agent: BNP Paribas, Luxembourg Branch, 60 avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. The risk category is justified by the investment mainly in equities, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

**Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Other risks materially relevant to the Product not included in the summary risk indicator:

- **Counterparty Risk:** this risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Liquidity risk:** this risk arises from the difficulty of selling a security at its fair value and within a reasonable period of time due to a lack of buyers.
- **Risk linked to the use of financial derivative instruments:** these instruments may involve a range of risks that may affect the net asset value.

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

## WHAT HAPPENS IF BNPP AM IS UNABLE TO PAY OUT?

The SICAV is incorporated as a separate entity distinct from BNPP AM.

In the event BNPP AM would default, the assets of the SICAV, held by a depository, would not be affected by this default.

In case of the default of the depository, the risk of financial loss of the SICAV is mitigated by the legal segregation of the assets of the depository from those of the Product/SICAV.
