FUNDS

SRI

MARKETING COMMUNICATION | FOR PROFESSIONAL CLIENTS ONLY | MARCH 2025

OBJECTIVE

The objective of the Sub-fund is to increase the value of its assets over the medium term by being exposed to a dynamic basket of equities listed on world developed markets, the components of which are chosen using a systematic selection method based on i) environmental, social and governance (ESG) criteria, ii) contribution to the 17 Sustainable Development Goals (the SDGs) adopted on 25 September 2015 by the United Nations General Assembly and especially designed to end poverty, protect the planet and reduce inequality, and iii) companies financial robustness.

KEY POINT

- The Sub-fund secures, during a 12-month period (1st July to 30th June), 90% of the highest Net Asset Value (NAV) reached since the last business day of the previous month of June (the Reference NAV). The protection level is then reset, every beginning of July, at 90% of the last valuation recorded for the fund.

THE EQUITY GLOBAL GOALS STRATEGY

The investment universe is comprised of world developed market listed companies assessed by Vigeo Eiris with sufficient liquidity¹ (~2400 companies). Vigeo Eiris is a global provider of ESG research and services.

I. Vigeo Eiris and BNP Paribas Asset Management exclusion of companies:

- Involved in armament, alcohol, nuclear, tobacco, pornography, coal, tar sands and oil shale extraction or production, or in controversial issues
- With a Vigeo Eiris ESG score in the lower third in their sector or below 30/100 overall
- With a BNP Paribas Asset Management ESG Score of 9 or 10 (10 being the worst score)

II. Selection of companies by a proven best-in-class financial approach based on:

Profitability → Prospects → Valuation

Portfolio selection based on risk control and a diversified exposure to sectors and countries:

- An expected tracking error vs a world developed benchmark, the STOXX Global 1800 Net Return USD index, not exceeding 3% p.a.
- A maximum of 30% weight difference for each region and sector vs this benchmark
- The weight of each stock must not exceed 1%

III. The final portfolio composition must satisfy global ESG and financial robustness criteria and have:

An optimised proportion of SDG Champions, which are assessed through the Vigeo Eiris Equities®, a proprietary methodology.

The SDG Champions must have a minimum global ESG score of 50/100 and be the first of their sector and geographical zone with regards to at least one of the following:

- Product score: The percentage of business activity dedicated to sustainable products
- Practices score: Measuring the companies actions towards achieving sustainable development
- Improvement in Practices score

FOCUS ON THE JULY-TO-JUNE PROTECTION MECHANISM

A 90% year protection

The protection secures 90% of each investment over the 12-month period (July-to-June), for which the value of the investment cannot fall below the protection level secured².

Locking every day 90% of the highest level reached during the July-to-June period

If the NAV reaches a new maximum, the protection level increases proportionally to always secure 90% of the Reference NAV³. If the NAV decreases, there is a formal BNP Paribas guarantee ensuring that it will not fall below the protection level during the July-to-June period.

And resetting the protection level every beginning of July

Every year, on the last business day of June, the NAV is recorded. The next day, the protection level is reset at 90% of this NAV, which becomes the new starting Reference NAV³. This new protection level is secured for the new July-to-June period².

Source: BNP Paribas, for illustration purposes only. ¹Average daily trading volume over the preceding 130 and 20 business days above 10 million USD. ²For any information on the guarantee and protection please refer to the prospectus of the fund concerned. ³Highest NAV reached since the last business day of the previous July-to-June period. Scenarios for illustrative purposes only. Figures are not based on historical or pro-forma data but only provided as an example. For further information, and in particular the risks of the product, please refer to the Prospectus and KIDs of the fund.

The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay, the fund described being in risk of capital loss. *The summary risk indicator is determined on a scale from 1 to 7 (7 being the highest risk level). It is subject to a periodical computation and can consequently change over time. We invite you to consult regularly the KID.

Funds' main common risks

- The following list of risk factors associated with the funds is not exhaustive. The risk factors that should be considered in connection with any investment include (but are not limited to) the following:
- An investment in the funds may involve a significant degree of risk. Investment in the funds is only suitable for those persons who are able to bear the economic risk of the investment, understand the degree of risk involved, believe that the investment is suitable based upon their investment objectives and financial needs, and have specific needs for liquidity of investment. There can be no assurance that the funds' objectives will be achieved or that there will be any return of capital.

Risks related to the model used by the Equity Global Goals strategy

- The model used to determine the allocation of the Equity Global Goals strategy is based on fundamental criteria designed to identify the stocks benefitting from good ESG performance according to Vigeo Eiris. There is a risk that the model will not be efficient as there is no guarantee that the indicators defined will be relevant in the future. They are defined partly on the basis of historical data and there is nothing to guarantee that previous market situations will repeat themselves in the future.

Risks related to the protection mechanism

- The protection mechanism implemented linked to the Guarantee involves that if the Net Asset Value per Share of each Class falls, the levels of protection will also be reduced accordingly. There is thus a risk that investors may lose almost all of their capital if they hold their Shares for a long period.

Risk of default of the Guarantor

- Shareholders' attention is drawn to the fact that they are exposed to the risk of default of the Guarantor.

Economic conditions

- The success of any investment activity is affected by general economic conditions, which may affect the level and volatility of interest rates and the extent and timing of investor participation in the equity markets. Unexpected volatility or illiquidity in the markets in which the funds hold positions could impair the funds' ability to carry out their business or cause them to incur losses. None of these conditions is within the control of the funds or its management company and/or investment manager and no assurances can be given that the funds or its management company and/or investment manager will anticipate these developments.

The funds will possess inherent risks

- These include, among other things, credit, liquidity, volatility, currency and interest rate risk, the financial condition of the underlying obligors, general economic conditions, market price volatility, the condition of certain financial markets, political events and developments or trends in any particular industry.

Currency exchange risk

- The value of an investment may be affected by fluctuations in the currency of the country in which the investment was made, or exchange control regulations. The Equity Global Goals Strategy may be exposed to eligible assets denominated in currencies other than the USD. Fluctuations in exchange rates between the USD and the other currencies may not be hedged and affect positively or negatively the Equity Global Goals Strategy value.
- However, the Sub-fund aims at hedging the Equity Global Goals Strategy portfolio return (and not each underlying currency exposure) from the USD to EUR, the reference currency of the Sub-fund.

Interest rate risk

- The value of an investment may be affected by interest rate fluctuations. Interest rates may be influenced by several elements or events, such as monetary policy, the discount rate, inflation, etc.

Derivatives risk

- The use of derivatives by the funds includes various risks. Those risks are (without limitation), the lack of secondary market liquidity under circumstances, valuations risks, the lack of standardization and regulation, the risk of leverage, the risk of counterparty.

Liquidity risk

- There is a risk that investments made in funds may become illiquid due to an over-restricted market (often reflected by a very broad bid-ask spread or by substantial price movements), or if their "rating" declines or their economic situation deteriorates.

Risk linked to equity markets

- The risks associated with investments in equities (and similar instruments) include significant fluctuations in prices, negative information about the issuer or market and the subordination of a company's equities to its bonds. The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay.

Counterparty risk

- This risk relates to the quality of the counterparty with whom the funds do business or enter into various transactions. This risk reflects the counterparty's ability to honor its commitments (payment, delivery, repayment, etc.)

The investments in the funds are subject to market fluctuations and the risks inherent in investments in securities. The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay. Investors are warned that the capital invested may not be fully recovered, mutual funds described in this document being in risk of capital loss and risk of counterparty. Past performance is not indicative of future performance.

Disclaimer

THEAM Quant" is the generic name given to a broad range of systematic strategies designed by BNP Paribas Global Markets and mostly implemented in Funds managed by BNP Paribas Asset Management
