## FUND’S CARBON MITIGATION FIGURES

- BNP PARIBAS ASSET MANAGEMENT France assesses the carbon intensity of companies (Scope 1 & 2) each quarter, taking into account the composition of the BNP Paribas Equity World Climate Care NTR Index to determine the amount of Carbon Credits necessary for mitigating its residual carbon emissions. Carbon credits are purchased from the Kasigau Corridor REDD+ project in Kenya, chosen for its environmental benefits and social co-benefits.
- BNP PARIBAS ASSET MANAGEMENT France then calculates the carbon intensity of the carbon credit share classes of the Fund, this being the carbon intensity of the exposure to the climate care investment strategy, at the beginning of each quarter, based on the average assets under management of the carbon credit share classes of the fund over the previous quarter (note that the carbon intensity reported below may differ from the Financed Carbon intensity found in the Key Indicators section, due to different carbon data providers).

## CARBON MITIGATION PROJECT UPDATE

### THE KASIGAU CORRIDOR REDD+\* PROJECT (THE “PROJECT”)

#### Highlights for 2024 include:

- **School Bursaries:** In 2024, the program covered 6,695 students, amounting to KSH 70 million (USD \$541,795). Students from various educational institutions, including secondary schools, colleges, and universities, were selected by a community-elected locational bursary subcommittee. Since its inception in 2012, the program has awarded over 45,000 scholarships, totalling over USD \$2,100,000.
- **Gender Committee Establishment:** Building on previous anti-harassment programs, an 18-member Gender Equality and Social Inclusion (GESI) committee was formed. This committee, comprising representatives from all departments, aims to promote best practices and develop initiatives that serve both employees and the community.
- **Road Safety Improvement:** Addressing the leading cause of deaths in rural Kenya, the Kasigau Corridor REDD+ Project collaborated with Elephant Cooperation during the summer of 2024. They provided safety gear, insurance certificates, driving tests, and licenses to 91 motorcycle taxi operators from Maungu. The riders completed an AA driving school course and the National Transport and Safety Authority (NTSA) test. They also pledged to stop transporting bush charcoal, bushmeat, and illegal goods.
- **Elephant Rescues:** During the past dry season in Kenya, wildlife took greater risks in search of water as usual drinking sources evaporated. In partnership with the Sheldrick Wildlife Trust, WWC helped rescue elephants from a dam in Kilibasi, south of Tsavo. After hours of digging, the team created a narrow passage, allowing the elephants to clamber to safety.
