This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Environmental Absolute Return Thematic Equity (EARTH), a Subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "Classic RH CZK Capitalisation" - ISIN code LU2192435027

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group

Objectives and Investment Policy

The fund is actively managed without reference to an index.

The Fund seeks to increase the value of its assets over the medium term by investing in shares issued by worldwide companies that address environmental challenges in Energy, Material, Agriculture and Industrial markets.

It implements a «long/short» investment strategy buying positions and/or selling positions, through direct investments or financial derivative instruments.

The Fund may also be invested in Mainland China shares restricted to foreign investors such as China A shares which can be listed on a Stock Connect or through the use of a specific license granted by the Chinese authorities.

The Fund may invest most of its assets in shares and equivalent securities, convertible bonds or indirectly through funds and financial derivative instruments.

The investment team applies also BNP PARIBAS ASSET MANAGEMENT Sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria such as but not limited to reduction of emissions of greenhouse gas, respect of human rights, respect of minority shareholders rights in the investments of the Fund.

An extra-financial strategy may comprise methodological limitations such as the ESG Investment Risk as defined by the asset manager.

Income are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

This share class aims at hedging the portfolio return from USD to CZK.

Risk and Reward Profile

Lower risk ← Higher risk
Typically lower reward Typically higher reward

---	---	---	----------	---	---	---

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
The risk category is justified by the investment in an equity neutral strategy in order to reduce the risk induced by equities and maintain the volatility below a maximum target.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.
- **Risks related to Shanghai – Hong Kong Stock Connect:** This risk relates to securities trading and clearing through the Stock Connect. Stock Connect is subject to quota limitation which may restrict the fund's ability to invest in China A-Shares on a timely basis. In addition, the Stock Connect is novel in nature, the regulations are untested and there is no certainty as to how they will be applied, which may affect the fund's ability to enforce its rights and interests in the China A-Shares.
